

# DYMAX EXCAVATOR WORK TOOLS

## 180° ROTATION LIMB SHEARS - 10-14" (25-36cm)

### OVERVIEW

The Dymax Rotating Limb Tree Shear for Excavators is extremely efficient in right of way maintenance for railroads and county highway departments.

The small, compact frame allows operators to shear limbs and trees in hard to reach areas. Dymax Rotating Limb Shears are ideal for trimming around power lines and tree pruning using excavators and backhoe loaders.

With 180° of hydraulic rotation, these shears will adjust to the limb. Like all Dymax products, they are backed by the highest level of support in the industry.

Dymax Rotating Limb Tree Shears are available in 10" (25cm) or 14" (36cm) capacities.

### FEATURES AND SPECIFICATIONS

- **Small compact frame design, which is ideal in hard-to-reach areas.**
- **Super fast cycle time.**
- **Heavy duty replaceable shear blade comprised of high tensile steel.**
- **Hoses and fittings are well protected from abusive elements found in shearing applications.**
- **180° hydraulic rotation setup through heavy duty slewing ring bearing for long life.**
- **10" or 14" diameter cutting capacity.**
- **Features bolt on top assembly, allowing for interchangeability between various machine manufacturers and sizes.**

Model #	Description/Max Shearing Diameter (in - cm)	Weight lb	Weight kg
DX-TS-RLS-10in-HX	Tree Shear, Limb Shear, 180° rotation (10in - 25.40cm)	1,200	544
DX-TS-RLS-14in-HX	Tree Shear, Limb Shear, 180° rotation (14in - 35.56cm)	2,100	953

Models require bi-directional (two-way) flow valve arrangement and lines group on excavator main pump. Dymax provides an electro-hydraulic diverter valve kit for operating the rotation positioning. The electro-hydraulic diverter valve kit requires installation of wire, switch, and fuse. Dymax Limb Shears feature bolt on top assemblies allowing for interchangeability between various machine manufacturers and sizes.
