

## DYMEX BALLAST TAMPER

### BALLAST TAMPER

The **DymexRail Ballast Tamper** delivers high compaction force and vibration frequency. Ideal for spot track tamping the Dymex Ballast tamper helps rail networks, transits, railway contractors stabilize tracks in areas such as bridge approachments, switch points, railyard applications, track sidings and mainline track supporting undercutting, cribbing and re-surfacing operations.

DymexRail Ballast Tampers quickly attach to hydraulic excavators, hi-rail grapple trucks and backhoe loaders. Available to work with pin grab coupler systems or can be paired with tiltrotator coupler systems. Models for fitting pin grab couplers are available with 180 or 360 degree rotation. Hi-rail grapple truck models feature integrated dangling rotator and are provided with clevis. Contact DymexRail for more information or custom design solutions.

# TRANSFORMING RAIL MAINTENANCE

The **DymaxRail Twin Ballast Tamper** uses twin workheads fastened to an intermediate frame allowing operators to tamp a full railtie in seconds.

Mount to compact excavators, backhoe loaders and grapple trucks. Dymax engineered vibration system delivers more power and durability.
