

RAIL RIDER COMPACT EXCAVATOR**RAIL RIDER COMPACT EXCAVATOR**

The **Dymax Rail Rider for Compact Excavators** is a blade mounted railgear kit that fits 5 and 6 ton hydraulic excavators and easily attaches to existing blade groups with no cutting or welding required. Operators can easily drive in one direction allowing the tracks to guide the machine on rail. Ideal for bridge maintenance and other railway applications.

Retractable rail wheels allow operators to raise up for using dozer blade. Provided with hydraulic kit allowing operators to raise and lower the rail wheels hydraulically. It's high rail simplified at it's best.
