

**TIE HANDLERS - INSERT/EXTRACT**

THE STRONGEST GRIP. CHANGE RAIL TIES FAST!

In North America, they're called railroad ties. Elsewhere, they're called sleepers. It doesn't matter what you call them, the **DymaxRail Tie Handlers** are up for the job. DymaxRail Tie Handlers, or tie grapplers, are both tie inserters and tie extractors. They can change wood and concrete ties in minutes flat, and can be used with backhoe loaders and excavators. Quickly change 20 to 50 ties per hour, and in some cases more, depending on the machine and operator performance. Dymax Rail Tie Handlers are built for years of productive use, service, and improve efficiency in tie changeouts.
