

INDUSTRIAL RAIL CART - LOAD TRANSFER MADE EASY

Dymax Industrial Rail Carts are ideal for steel mills and manufacturing facilities that are needing to move large steel plate, materials or welded fabrications such as tanks or vessels. Easily transport loads between buildings using a Dymax Industrial Rail Cart. Our designs are suited for large capacity solutions, but we can make smaller capacities for customers moving lighter loads. Each cart is equipped with standard steel decking and a single park brake mounted to one wheel. Custom design solutions available upon request. Contact DymaxRail sales for more information.

UP TO 60T CAPACITIES. CUSTOM SOLUTIONS.

Extra thick top deck for blast rooms
