

BALLAST TAMPER-SERIES 14

PACK BALLAST FAST

STAY IN THE SEAT. NO HANDWORK NEEDED.

- Fits:** Backhoe, Hydraulic Excavator, Railway Cranes or Grapple Trucks
- Rotation:** 270 degree rotation or made to fit tiltrotator
- Hydraulics:** Requires 2 auxiliary circuits and case drain line

The **Series 14 Ballast Tamper** attachment from DymaxRail is a simple, cost-effective alternative to a full tamping machine. It connects quickly to excavators, backhoes, and grapple trucks, making it ideal for turnout, siding, and spot tamping work. With a tough, compact build and high-force vibration, the Series 14 tamper performs reliably, day after day.

DymaxRail engineered vibrator assembly delivers powerful performance and long-term durability with serviceable components for extended life.

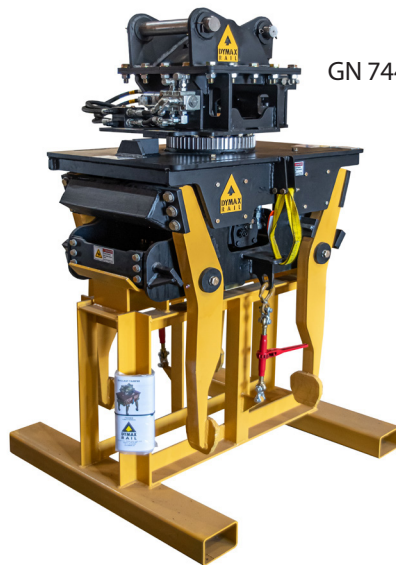

APPLICATIONS

- **Spot tamping along mainline, siding, and yard track**
- **Turnout tamping**
- **Ballast tightening around ties after undercutting**
- **Crib compaction**
- **Branch line maintenance**

KEY BENEFITS

- **Powerful & Precise:** High-frequency vibration with 10 tons of squeeze force delivers fast, consistent tamping and superior track stability.
- **Built Hell-for-Stout:** 2-inch thick steel tines and heavy-duty motor construction ensure long life in the harshest rail conditions.
- **Versatile by Design:** Compatible with backhoe loaders, excavators, and grapple trucks, with optional 270° rotation or fixed mount setups.
- **Available in a SERIES 14 – SWITCH & CROSSING TWIN-TAMPER.** Built for 15-ton and larger hi-railed excavators. Dual tamping workheads meet standard gauge spacing, with independent hydraulic lift for clear, fast work in tight switch and crossing areas.

SINGLE TAMPER WORKHEAD BACKHOE, EXCAVATOR, TRUCK CRANE

GN 7444D/7925D

GN 7563D

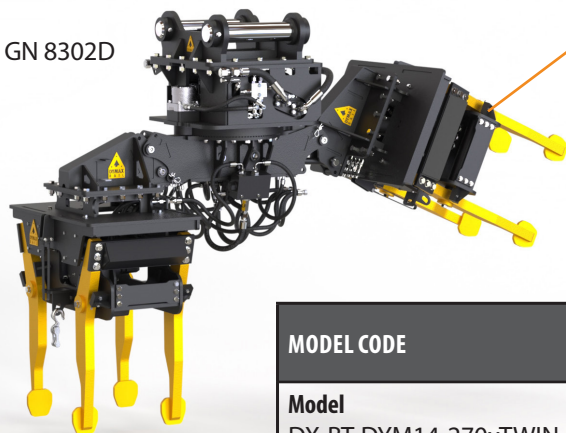

GN 8237D

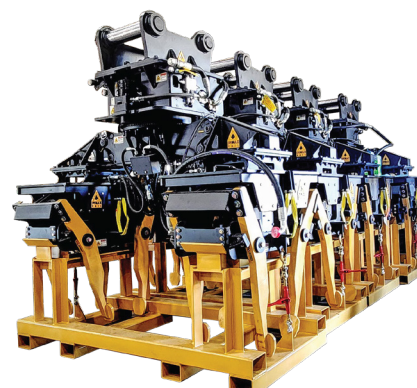

MODEL CODE	DESCRIPTION	WEIGHT (LBS)	CIRCUITS
Models with 270° rotation systems for fitting pin or wedge type coupler systems			
GN 7444D (12v) & 7925D (24v) Model DX-BT-DYM14-270x1-HX or BL	Ballast Tamper-DymaxRail Series 14-270 degree rotation x 1 motor for Excavator or Backhoe Loader	2100	2 circuits and drain line required
GN 7563D2 (12v) Model DX-BT-DYM14-270x1-GT-10	Ballast Tamper-DymaxRail Series 14-270 degree rotation x 1 motor for Grapple or Crane mount	1850	
Models for Tiltrotator coupler system			
GN 8237D Model DX-BT-DYM14-TRQx1-HX or BL	Ballast Tamper-DymaxRail Series 14-Tilt Rotator Hookup x 1 motor for Excavator or Backhoe Loader	2100	2 circuits and drain line required

TWIN TAMPER - OPTION

GN 8302D

Both workheads hydraulically raise 70° and include mechanical pin locks

MODEL CODE	DESCRIPTION	WEIGHT (LBS)	CIRCUITS
Model DX-BT-DYM14-270xTWIN-HX-20/25/30T	Ballast Tamper-DymaxRail Series 14-270 degree rotation x TWIN WORKHEAD	5500	Specialized hydraulic requirements. Contact DymaxRail
DX-BT-DYM14-TRQTWIN-HX-20/25/30T	Ballast Tamper-DymaxRail Series 14-for Tilt Rotator Hookup x TWIN WORKHEAD	4650
